Federal State Autonomous Educational Institution of Higher Education
PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA named after Patrice Lumumba
RUDN University

Faculty of Science

educational division (faculty/institute/academy) as higher education programme developer

COURSE SYLLABUS

Modern organic synthesis and pharmacology

course title

Recommended by the Didactic Council for the Education Field of:

04.04.01 «Chemistry»

field of studies / speciality code and title

The course instruction is implemented within the professional education programme of higher education:

«Bioenergies and Biorefineries»

higher education programme profile/specialisation title

2025

1. COURSE GOAL

The goal of the course "Modern organic synthesis and pharmacology" is to familiarise with the basic concepts of Green Chemistry principles in modern organic chemistry. To introduce students to Alternative Synthetic Pathways. To define the applicability limits and the existing methods problems.

2. REQUIREMENTS FOR LEARNING OUTCOMES

Mastering the course "Modern organic synthesis and pharmacology" is aimed at the development of the following competences:

Table 2.1. List of competences that students acquire through the course study

Competence code	**Competence descriptor**	**Competence formation indicators** (within this course)
GPC-2	Ability to analyze, interpret and generalize the results of experimental and computational-theoretical work in the chosen field of chemistry or related sciences.	GPC-2.1 Ability to carry out a critical analysis of the results of own experimental and computational-theoretical works and to interpret them correctly
		GPC-2.2. Ability to formulate summary and conclusions based on the results of the analysis of literature data, own experimental and computational-theoretical works in the chosen field of chemistry or related sciences
PC-1	Ability to develop a work plan and to choose adequate methods for solving research problems in the chosen field of chemistry, chemical technology or sciences related to chemistry	PC-1.1. Ability to prepare a general plan of research and detailed plans for individual stages;
		PC-1.2. Ability to select experimental and calculation-theoretical methods for solving the problems based on the available material and time resources

3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The course "Modern organic synthesis and pharmacology" refers to the **variable** component of B1 block of the higher educational programme curriculum.

Within the higher education programme students also master other (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the course study.

Table 3.1. The list of the higher education programme components/disciplines that contribute to the achievement of the expected learning outcomes as the course study results

Competence code	**Competence descriptor**	**Previous courses/modules***	**Subsequent courses/modules***
GPC-2	Ability to analyze, interpret and generalize the results of experimental and computational-		Actual problems of modern chemistry History and philosophy of science Bioproducts, Biomaterials and

	theoretical work in the chosen field of chemistry or related sciences.		Biorefineries Advanced Organic Synthesis Catalyst (nanomaterials) design and applications Catalysis: from Basic principles to applications. Homogeneous, Heterogeneous, PhotoCatalysis, Biocatalysis, Electrocatalysis Experimental lab 1: Flow synthesis and alternative technologies Experimental lab 2: Biorefineries and Bioproducts Experimental lab 3: Advanced Organic Synthesis Student Scientific-Research work Pre-graduation practical training
PC-1	Ability to develop a work plan and to choose adequate methods for solving research problems in the chosen field of chemistry, chemical technology or sciences related to chemistry		Advanced Organic Synthesis Catalyst (nanomaterials) design and applications Experimental lab 1: Flow synthesis and alternative technologies Experimental lab 2: Biorefineries and Bioproducts Experimental lab 3: Advanced Organic Synthesis Emerging contaminants: from fate to environmental remediation The methods of working with databases Student Scientific-Research work Pre-graduation practical training

* To be filled in according to the competence matrix of the higher education programme.

4. COURSE WORKLOAD AND ACADEMIC ACTIVITIES

The total workload of the course “Modern organic synthesis and pharmacology” is 4 credits (144 academic hours).

*Table 4.1. Types of academic activities during the periods of higher education programme mastering (**full-time training**)**

Type of academic activities		Total academic hours	Training modules			
			1	2	3	4
Contact academic hours		*27*	*27*			
including:						
Lectures (LC)		18	18			
Lab work (LW)		9	9			
Seminars (workshops/tutorials) (S)						
Self-studies		*108*	*108*			
Evaluation and assessment (exam/passing/failing grade)		*9*	*9*			
Course workload	academic hours	**144**	**144**			
	credits	**4**	**4**			

5. COURSE MODULES AND CONTENTS

Table 5.1. Course contents and academic activities types

Course module title	Course module contents (topics)	Academic activities types
Module 1. Pharmacology	Topic 1.1 Introduction to Pharmacology	LC
	Topic 1.2 Physicochemical properties of Active Pharmaceutical Ingredients (APIs). Ionization of pharma compounds. Acidic APIs. Basic APIs. Isoelectric point. pKa and pKb. Partition coefficient.	LC
	Topic 1.3 Pharmacokinetics and pharmacodynamics: Concepts and examples. Pharmacokinetics: Absorption and distribution of APIs. Bioavailability. Pharmacodynamics. Pharmacological receptors. Agonist and antagonist molecules. APIs classification: structural specific and nonspecific APIs	LC, LW
	Topic 1.4 Structural characteristics of APIs and Pharmacological action. Stereoisomerism. Optic, geometric and conformational isomers and pharmacological action. Chemical Isostery. Concept. Bioisosterism. Classic and non classic bio-isosterism	LC, LW
	Topic 1.5 Rational design of APIs. Pharmacological design. Pharmacomodulation. QSAR methods for pharma design. Hammet equation. Taft equation. Hansch method. Method of Free-Wilson. QSAR-3D methodologies. Examples.	LC, LW
	Topic 1.6 Metabolic pathways of APIs. Definition of toxicology. Basic principles of toxicology. Synergism, potentiation and antagonism. Dose-response relationships. Xenobiotics and endogenous substances. Examples. Pharma	LC, LW

Course module title	Course module contents (topics)	Academic activities types
	metabolism. Metabolic reactions (Phase I, Phase II). Metabolic routes. Examples for common pharmaceuticals.	
Module 2. Pharma synthesis	Topic 2.1 Green metrics and Green Chemistry in Pharma Introduction and applications of fundamental green metrics into modern synthesis; solvent selections and applications of sustainable solvent systems in modern approaches to organic synthesis and catalysis. Atom economy. E-factor. Functional Oriented Synthesis (FOS).	LC, LW
	Topic 2.2 Real examples of application of Green Chemistry principles I in Pharma synthesis: Synthesis of Sildenafil (Viagra®, Pfizer), Synthesis of Talampanel (LY300164, Lilly Research Laboratories, Green Chemistry Award 1999), Synthesis of Ganciclovir (Cytovene®, Roche, Green Chemistry Award 2000).	LC
	Topic 2.3 Real examples of application of Green Chemistry principles II in pharma synthesis: Synthesis of Sertraline (Zoloft®, Pfizer, Green Chemistry Award 2002), Synthesis of Aprepitant (Emend®, Merck &Co., Green Chemistry Award 2005); Synthesis of Sitagliptin (Juvenia™, Merck &Co. Green Chemistry Award 2006).	LC, LW
	Topic 2.4 Flow approaches to sustainable pharmaceuticals synthesis	LC, LW

* - to be filled in only for **full** -time training: *LC - lectures; LW - lab work; S - seminars.*

6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Table 6.1. Classroom equipment and technology support requirements

Type of academic activities	Classroom equipment	Specialised educational / laboratory equipment, software, and materials for course study (if necessary)
Lecture	A lecture hall for lecture-type classes, equipped with a set of specialised furniture; board (screen) and a set of devices for multimedia presentations.	Projector, motorized screen for projectors, Wi-Fi
Lab work	A classroom for laboratory work, individual consultations, current and mid-term assessment; equipped with a set of specialised furniture and machinery.	A set of specialized furniture; specialized equipment of the chemical laboratory: fume hood SHVP-4, fume hood SHVP-2, rotary evaporator Hei-value digital G3B, rotary

Type of academic activities	Classroom equipment	Specialised educational / laboratory equipment, software, and materials for course study (if necessary)
		evaporator IKA, digital devices for determining the melting point SMP10; electronic laboratory scales AND EK-610, MK-M flask heaters of different volumes, drying cabinet, magnetic stirrer MRHei-Mix S, magnetic stirrer with heating MRHei-Standart, refractometer, combined laboratory water bath, vacuum chemical station RS3001 VARIO-pro, circulation cooler Rotacool Mini, rotary plate pump vacuum RZ2.5, membrane vacuum chemical pump MZ2CNT, Steinel thermal air blower, Spectroline UV lamp, electronic vacuum controller with CVC3000 detect Vacuumbrand valve, stainless steel emergency cabin SHVV, chemical dishes, refrigerator; wi-fi
Self-studies	A classroom for self-studies (can be used for seminars and consultations), equipped with a set of specialised furniture and computers with access to the electronic information and educational environment.	**Faculty of Science Reading Room** Ordzhonikidze D.3. Coworking area Monday - Friday 10.00 – 22.00 **Reading room of the main building of the RUDN** Coworking area Monday - Saturday 9.00 - 23.00 Hall No. 2 Monday - Thursday 10.00 - 17.45 Friday 10.00 - 16.45 Hall No. 6 Monday - Thursday 10.00 - 17.45 Friday 10.00 - 16.45

* The premises for students' self-studies are subject to **MANDATORY** mention
