Assessment tools

Assessment methods:

- protocols of lessons and extracurricular activities,
- lesson analysis.

Final assessment:

At the end of the teaching internship, a conference is held at which trainees **report** on the work done, answering questions on the teaching internship (received upon entering the internship) and with a report. **Pass / fail with the score.**

Report requirements.

1. The title page, certified by the base of internship and the corresponding university department.
2. The individual student work plan for the period of internship
3. A copy of the letter of guarantee from the organization.
4. A copy of the order on the appointment of the head from the relevant organization.
5. Safety instructions (certified copy of the title page)
6. Characteristics for a trainee student, certified by Science / Ecology teacher and a classroom leader.
7. The schedule of the lessons of the class to which the student-trainee is assigned.
8. The calendar plan on Ecology / Science for the class, to which the student-trainee is assigned.
9. The thematic Ecology / Science lesson plan of the class, to which the student is assigned as an intern.
10. The report - a conclusion on the internship of at least 5 pages. The presentation of the report (Power Point slides).

Questions to prepare for certification

1. Formulate the goals and objectives of the internship, taking into account the specifics of the organization.
2. What are the basic principles for increasing the level of unity of the team based on common values and ideas used during the teaching internship.
3. Name the rules of a constructive dialogue in the multicultural environment.
4. Name the content and purpose of professional self-education and self-development.
5. Name the essence and structure of educational processes, patterns of physical and mental development and features of their manifestation in the educational process in different age periods.

6. Name the goals, objectives and purpose of psychological and pedagogical support of students in the educational process.
7. Name science based methods and technologies of psychological and pedagogical accompanying of students.
8. What are the legal documents regulating professional activities in the organization where you internshipd.
9. Name the rules and methods of providing first aid.
10. Name the requirements of educational standards and educational programs used during the teaching internship.
11. What are the modern methods and technologies of teaching Ecology, Science?
12. Diagnostics, methods for developing methodological materials and recommendations used during the teaching internship.
13. Name the theories and technologies of training, education, spiritual and moral personal development, support of the subjects of the pedagogical process in the educational and extracurricular activities used during the internship.
14. Name the possibilities of the educational environment for achieving personal, meta-subject and subject learning outcomes and quality assurance of the educational process by means of taught subjects used during the internship.

Assessment and grading system and characteristics of the assessment scale

The student's activity is assessed on a 100-point scale.

Rules for taking into account the rating when grading. Description of the point-rating system

Evaluation of traditional	Unsatisfactory.		Satisfactory		Good	Excellent	
ECTS score	F(2)	FX(2+)	E(3)	D(3+)	C(4)	B(5)	A(5+)
Maximum score 100	Less than 30	31-50	51-60	61-68	69-85	86-94	95-100
credited	51-100						

Description of ECTS grades:

A - "Excellent":the theoretical content of the research material was mastered completely, without gaps, the necessary practical skills for working with the mastered material were formed, all the tasks provided for by the training program were completed, the quality of their performance was estimated by a number of points close to the maximum.

B - "Very good": the theoretical content of the R&D material has been mastered completely, without gaps. The necessary practical skills for working with the mastered material are basically formed, all the training tasks provided for by the training program are completed, the quality of most of them is estimated by a number of points close to the maximum.

S - "Good": the theoretical content of the research material is mastered completely, without gaps, some practical skills of working with the mastered material are not sufficiently formed, allthe tasks were completed by the training program, the quality of performance of none of them was assessed by the minimum number of points, some tasks were completed with errors.

D - "Satisfactory": the theoretical content of the research material has been partially mastered, but the gaps are not significant, the necessary practical skills for working with the

mastered material are basically formed, most of the tasks provided for by the training program have been completed, some of the completed tasks may contain errors.

E - "Mediocre": the theoretical content of the research material has been partially mastered, some practical work skills have not been formed, many tasks provided for by the training program have not been completed, or the quality of some of them has been assessed with a number of points close to the minimum.

FX - "Conditionally unsatisfactory": the theoretical content of the research material has been partially mastered, the necessary practical work skills have not been formed, most of the training tasks provided for by the training program have not been completed, or the quality of their implementation has been assessed by a number of points close to the minimum; with additional independent work on the material of the R&D material, it is possible to improve the quality of the performance of educational tasks.

F - "Definitely unsatisfactory": the theoretical content of the R&D material has not been mastered. The necessary practical work skills have not been formed, all the completed training tasks contain gross errors, additional independent work on the R&D material will not lead to any significant improvement in the quality of the training tasks.

positive ratings, upon receipt of which the course (research work) is credited to the student as passed, are grades A, B, C, D and E.
