**PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA  
NAMED AFTER PATRICE LUMUMBA  
Institute of Environmental Engineering**

(наименование основного учебного подразделения (ОУП)-разработчика ОП ВО)

## **COURSE SYLLABUS**

### **History and methodology of ecology and natural resources management**

(наименование дисциплины/модуля)

### **Recommended by the Methodological Council for the Education Field:**

#### **05.04.06 Ecology and nature management**

(код и наименование направления подготовки/специальности)

### **The discipline is mastered within the framework of the main professional higher education program:**

#### **Economics of natural resources management**

(наименование (профиль/специализация) ОП ВО)

## 1. COURSE GOALS

The course is aimed on receiving of basic knowledge about the development, current state and perspectives of ecology as complex scientific field.

## 2. LEARNING OUTCOMES

The mastering of the discipline "History and methodology of ecology and natural resources management" is aimed at the formation of the following competencies (parts of competencies) in students:

*Table 2.1. List of competencies formed by students during the development of the discipline (LEARNING OUTCOMES)*

| Code   | Competence                                                                                                                                          | Indicators of competence achievement<br>(within the framework of this discipline)                                                                       |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| GPC -2 | Able to use special and new sections of ecology, geoecology and nature management in solving research and applied problems of professional activity | <b>GPC -2.1</b> Knows the basics of ecology, geoecology, environmental economics and circular economy, as well as environmental management              |
|        |                                                                                                                                                     | <b>GPC -2.2</b> Able to use environmental, economic and other special knowledge and algorithms to solve professional problems                           |
|        |                                                                                                                                                     | <b>GPC -2.3</b> Able to find, analyze and competently use the latest information and modern techniques in the performance of research and applied tasks |

## 3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The discipline "History and methodology of ecology and natural resources management" refers to Compulsory Disciplines of the Higher Education Program.

Within the framework of the higher education program, students also master other disciplines and/or practices that contribute to expected learning outcomes of the discipline "History and methodology of ecology and natural resources management".

*Table 3.1. List of Higher Education Program components that contribute to expected learning outcomes*

| Code   | Competence                                                                                                                                           | Previous Disciplines (Modules)                                                                                                             | Subsequent Disciplines (Modules)                                                                                                                                                                                                                                                                                                               |

*Educational and methodological materials for independent work of students during the development of the discipline/ module \*:*

1. A course of lectures on the discipline "History and methodology of ecology and natural resources management".

\* - all educational and methodological materials for independent work of students are placed in accordance with the current procedure on the discipline page in the Telecommunication educational and Information System!

## 8. MID-TERM ASSESSMENT AND EVALUATION TOOLKIT

Evaluation materials and a point-rating system\* for assessing the level of competence formation (part of competencies) based on the results of mastering the discipline "History and methodology of ecology and natural resources management" are presented in the Appendix to this Work Program of the discipline.

\* - evaluation toolkit and ranking system are formed on the basis of the requirements of the relevant local regulatory act of the RUDN (regulations / order).
