RUDN University**

Educational and Scientific Information Library Centre (Scientific Library)

(educational division (faculty/institute/academy) as programme developer)

COURSE SYLLABUS

Information databases for scientific research and publication activities

(course title)

Scientific specialty:

For all PhD Programs

(scientific speciality code and title)

The course instruction is implemented within the PhD programmes:

For all PhD Programs

(PhD program title)

1. DISCIPLINE (MODULE) GOAL

The discipline 'Information databases for scientific research and publication activities' is aimed to familiarize students with modern trends and options for information-searching in conditions of its redundancy; to teach students to navigate information flows; to provide insight into research international resources; to instill skills of working with specialized resources - information databases; to develop skills of information search, evaluation of search results, systematization of relevant and reliable information; to be capable to use the obtained skills in research activity (publications, thesis).

Tasks:

Use of modern information resources in educational and research activities.

Increasing students' information culture and literacy.

2. REQUIREMENTS TO PHD-STUDENTS ON FINISHING THE COURSE

As a result of studying the discipline 'Information databases for scientific research and publication activities', the graduate should know, be able to, and be proficient in:

The graduate should know:

– modern scientific achievements in their field and in interdisciplinary areas.

The graduate should be able to:

– critically analyze and evaluate modern scientific achievements;
 – generate new ideas when solving research and practical problems, including in interdisciplinary areas;
 – participate in the work of Russian and international research teams to solve research and educational problems;

– plan and solve problems of their own professional and personal development;

– independently carry out research activities in the relevant professional field;

– use modern research methods and information and communication technologies;

– carry out teaching activities in accordance with basic Educational Programs of Higher Education.

The graduate should be proficient in:

– critical analysis and evaluation of modern scientific achievements;

– generating new ideas in research and practical problem-solving;

– participating in Russian and international research teams;

– planning and managing their own professional and personal development;

– independently conducting research activities using modern methods and ICT;

– delivering teaching activities within higher education programs.

3. WORKLOAD OF THE DISCIPLINE AND TYPES OF ACTIVITIES

The overall workload of the discipline Information databases for scientific research and publication activities is 1 credit units (36 academic hours).

| Types of activities | Total ac. hrs. | Semesters |
|---|----------------|-----------|
| | | 1 |
| <i>Classroom activities (total), including:</i> | 18 | |
| в том числе: | | |
| Lectures (LC) | 10 | 10 |
| Laboratory activities (LA) | – | – |
| Practical lessons/Seminars (PC) | 8 | 8 |
| <i>Independent work</i> | | |
| <i>Intermediate certification (test with assessment/exam)</i> | | |
| Overall workload | ac. hrs. | 18 |
| | credits | 1 |

4. CONTENT OF THE DISCIPLINE

| Name of the discipline section | Contents of the section (topic) | Type of study work |
|--------------------------------|---------------------------------|--------------------|
|--------------------------------|---------------------------------|--------------------|

| | | |
|---|---|--------|
| Section 1. Fundamentals of Information Literacy of working with Internal and International Databases | Theme 1.1. Polythematic information resources | LC |
| | Theme 1.2. Specialized databases | LC |
| | Theme 1.3. Officially verified open access resources: databases, archives and repositories | LC/ PC |
| Section 2. Methods for selecting Journals for Publications and Promoting Publication Activities | Theme 2.1. Scientometric databases. | LC/ PC |
| | Theme 2.2. Modern methods of scientific communication. Scientific social networks, registries and personal identifiers. | LC/ PC |

5. EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

| Room Type | Room Equipment | Specialized educational / laboratory equipment, software and materials for mastering the discipline |
|--------------------|--|---|
| Class for Seminars | Room for seminar-type classes, equipped with a set of specialized furniture, board (screen) and technical / multimedia gadgets | Not necessary |
| Self-Work Class | Room for self-working (can be used for lecture and seminars activities), equipped with a set of specialized furniture, board (screen) and technical / multimedia gadgets and computers with an access to EIPES | Not necessary |

6. METHODOLOGICAL SUPPORT AND LEARNING MATERIALS
