COURSE WORKING PROGRAM

Marketing metrics

(name of the discipline/module)

Recommended by the MSS for the direction of training/specialty:

38.04.02 «Management»

(code and name of the training area/specialty)

The development of the discipline is carried out within the framework of the implementation of the main professional educational program of higher education (EP HE):

International marketing

(name (profile/specialization) of the EP HE)

1. COURSE GOALS

The purpose of mastering the discipline "Marketing metrics (effectiveness of marketing projects)" is to develop students' skills in assessing the internal and external environment of an enterprise, determining the effectiveness of marketing projects; forming a system of indicators for a comprehensive business assessment.

2. REQUIREMENTS FOR THE RESULTS OF MASTERING THE DISCIPLINE

The development of the discipline "Marketing metrics" is aimed at the formation of the following competencies (parts of competencies) in students:

Competence achievement indicators (within this Code Competence course) CC-6.4.Distributes tasks into long-, medium- and short-Able to identify and implement term ones with justification of relevance and analysis of resources for their implementation the priorities of his own activi-UC-6 ties and ways to improve it based on self-assessment CC-7.1. Searches for the necessary sources of infor-Capable of using digital techmation and data, perceives, analyzes, remembers and nologies and methods of transmits information using digital means, as well as searching, processing, analyzusing algorithms when working with data obtained ing, storing and presenting infrom various sources data in order to effectively use the UC-7 formation (in the professional information received to solve the tasks field) in the digital economy CC-7.2. Evaluates information, its reliability, builds and modern corporate inforlogical conclusions based on incoming information and mation culture. data OPK-2.1. Owns modern techniques and methods of data collection, methods of search, processing, analy-Able to apply modern techsis and evaluation of information for solving manageniques and methods of data ment tasks collection, advanced methods of their processing and analy-OPK-2.2. Conducts analysis and modeling of man-GPC-2 sis, including the use of intelliagement processes in order to optimize the organizagent information and analytical tion's activities systems, in solving management and research tasks OPK-2.3. Uses modern digital systems and methods in solving management and research tasks OPK-6.1. Owns digital technologies for the successful He is able to critically evaluate solution of professional tasks the possibilities of digital technologies for solving profes-GPC-6 sional tasks, work with digital OPK-6.2. Is able to work with digital data, evaluate data, evaluate their sources and their sources and relevance relevance

Table 2.1. List of competencies formed by students during the development of the discipline (results of the development of the discipline)

Code	Competence	Competence achievement indicators (within this course)
		OPK-6.3. Is able to use general or specialized applica- tion software packages designed to perform profession- al tasks
PC-6	Able to manage the marketing activities of an international company	 PC-6.1 Knows the specifics of working with various international marketing tools PC-6.2 Knows the basics of international sales, international marketing communication PC-6.3 Knows how to apply methods of evaluating the effectiveness of solutions in the field of international marketing PC-6.4 Knows how to analyze the actions of international partner companies PC-6.5 Possesses the analytical, systems and communication skills to be successful in a rapidly changing international marketing environment PC-6.6 Possesses the skills of a creative approach to the problems of developing and implementing international marketing strategies of the company

3. THE PLACE OF DISCIPLINE IN THE STRUCTURE OF THE EP HE

The discipline "Marketing metrics" refers to the variable component formed by the participants of the educational relations of the block B1 of the OP HE.

Within the framework of the educational program, students also master other disciplines and/or practices that contribute to achieving the planned results of mastering the discipline "Marketing Metrics".

Code	Competence name	Previous courses	Next courses
UC-6	Able to identify and imple- ment the priorities of his own activities and ways to im- prove it based on self- assessment		Methodology of management problems research Digital marketing Innovative entrepreneurship Research work
UC-7	Capable of using digital technologies and methods of searching, processing, ana- lyzing, storing and present- ing information (in the pro- fessional field) in the digital economy and modern corpo- rate information culture.		Methodology of management problems research Innovative entrepreneurship Negotiation techniques Research work

Table 3.1. The list of the components of the educational program that contribute to the achievement of the planned results of the development of the discipline

Code	Competence name	Previous courses	Next courses
GPC-2	Is able to apply modern tech- niques and methods of data collection, advanced methods of their processing and anal- ysis, including the use of in- telligent information and analytical systems, in solving management and research tasks		Modern strategic analysis Finances of organizations Marketing audit
GPC-6	He is able to critically evalu- ate the possibilities of digital technologies for solving pro- fessional tasks, work with digital data, evaluate their sources and relevance		Managerial economics Finances of organizations Digital marketing Marketing forecasting methods
PC-6	Able to manage the market- ing activities of an interna- tional company		Modern strategic analysis Finances of organizations Marketing forecasting methods Research work Pre-graduate practice

 \ast - it is filled in in accordance with the matrix of competencies and SP EP HE

4. SCOPE OF DISCIPLINE AND TYPES OF ACADEMIC WORK

The total labor intensity of the discipline "Marketing metrics" is 5 credit units.

Table 4.1. Types of educational work by periods of mastering the EP in for FULLtime education

Description of the point-rating system

Conditions and criteria for grading. Students are required to attend lectures and seminars, participate in certification tests, and complete teacher assignments. Active work at the seminar is especially appreciated (the ability to conduct a discussion, a creative approach to the analysis of materials, the ability to clearly and succinctly formulate their thoughts), as well as the quality of preparation of control papers (tests), presentations and reports.

Grades in the disciplines taught are set based on the results of the study demonstrated by students throughout the entire period of study (usually a semester). The final grade is determined by the sum of points received by students for various types of work during the entire period of study provided by the curriculum.

All types of educational work are carried out exactly within the time limits stipulated by the training program. If a student has not completed any of the training tasks without valid reasons (missed a test, passed an abstract later than the due date, etc.), then points are not awarded to him for this type of academic work, and works prepared later than the due date are not evaluated. For various types of work during the entire period of study, a student can receive a maximum amount of 100 pointsB.

BRS points	Traditional assessments of the	ECTS scores
	Russian Federation	
95-100	Excellent – 5	A (5+)
86 - 94		B (5)
69 - 85	Good – 4	C (4)
61 - 68	Satisfactory – 3	D (3+)
51-60		E (3)
31-50	Unsatisfactory – 2	FX (2+)
0-30		F (2)
51 - 100	Test	Passed

Point-rating system of knowledge assessment, rating scale

Description of ECTS grades:

A ("Excellent") - the theoretical content of the course has been fully mastered, without gaps, the necessary practical skills of working with the mastered material have been formed, all the training tasks provided for in the training program have been completed, the quality of their performance is estimated by the number of points close to the maximum.

In ("Very good") - the theoretical content of the course is fully mastered, without gaps, the necessary practical skills of working with the mastered material are mainly formed, all the training tasks provided for in the training program are completed, the quality of most of them is estimated by the number of points close to the maximum.

C ("Good") - the theoretical content of the course has been fully mastered, without gaps, some practical skills of working with the mastered material have not been sufficiently formed, all the training tasks provided for in the training program have been completed, the quality of none of them has been evaluated with a minimum number of 5 points, some types of tasks have been completed with errors.

D ("Satisfactory") - the theoretical content of the course has been partially mastered, but the gaps are not significant, the necessary practical skills of caring for the mastered material have been mainly formed, most of the training tasks provided for in the training program have been completed, some of the completed tasks may contain errors.

E ("Mediocre") - the theoretical content of the course has been partially mastered, some practical work skills have not been formed, many of the training tasks provided for in the training program have not been completed, or the quality of some of them is estimated by the number of points close to the minimum.

FX ("Conditionally unsatisfactory") - the theoretical content of the course has been partially mastered, the necessary practical skills have not been formed, most of the training tasks provided for in the training program have not been completed or the quality of their performance has been assessed by a number of points close to the minimum; with additional independent work on the course material, it is possible to improve the quality of the training tasks

F ("Certainly unsatisfactory") - the theoretical content of the course has not been mastered, the necessary practical work skills have not been formed, all completed training tasks contain gross errors, additional independent work on the course material will not lead to any significant improvement in the quality of training tasks.

Fund of evaluation funds for conducting intermediate certification of students in the discipline

Materials for assessing the level of mastering the educational material of the discipline (evaluation materials), including a list of competencies indicating the stages of their formation, a description of indicators and criteria for assessing competencies at various stages of their formation, a description of evaluation scales, standard control tasks or other materials necessary for assessing knowledge, skills, and (or) experience of activity characterizing the stages of competence formation in the process of mastering the educational program, methodological materials defining the procedures for assessing knowledge, skills, skills and (or) experience of activity characterizing the stages of competence formation have been developed in full and are available to students on the discipline page in the TUIS RUDN.

The program is compiled in accordance with the requirements of the OS in the RUDN
