International Corporate Marketing Strategies

(name of discipline/module)

**Recommended by the Didactic Council for the Education Field of
38.04.01 Economics**

(code and name of the direction of training/specialty)

**The development of the discipline is carried out within the framework of the
implementation of the main professional educational program of higher education:**

International trade

(name (profile/specialization))

1. COURSE GOALS

The main objective of this course is a general overview of the main directions of development of international marketing strategies, including strategic marketing concepts, tools and techniques, as well as the formation of a system of knowledge in the field of marketing, relevant competencies that allow you to successfully work in the marketing services of international companies in various business areas.

The course examines the marketing issues faced by international companies caused by the complexity of their cross-border activities. A rapidly changing world is becoming a more challenging place to work, so it's important to empower students to introduce them to hands-on experiences to identify the marketing benefits of global business opportunities.

The course has an emphasis on the development of students' analytical, critical problem-solving skills, through the use of the following educational technologies: problem-based discussions, interactive lectures and case studies. Students have the opportunity to develop their own course project as part of a team. Joint teamwork will benefit through the additional experience provided by students of various undergraduate educational programs, which will enhance the results of knowledge of the practical basics of marketing and provide valuable experience of an interdisciplinary approach.

2. LEARNING OUTCOMES

Studying the discipline "World experience in the implementation of management information systems" is aimed at the formation of the following competencies (part of the competencies) among students:

Table 2.1. The list of competencies formed in students when studying the discipline (results of mastering the discipline)

Competence code	Competence	Competence indicators (within the framework of this discipline)
GC-1	Able to carry out search, critical analysis of problem situations on the basis of a systematic approach, to develop an action strategy	GC-1.1. Analyzes the task, highlighting its basic components
		GC-1.2. Defines and ranks the information required to solve the task
		GC-1.3. Searches for information to solve the problem on various types of requests
		GC-1.4. Offers options for solving the problem, analyzes the possible consequences of their use
		GC-1.5. Analyzes ways to solve the problems of ideological, moral and personal character on the basis of the use of the main philosophical ideas and categories in their historical development and socio-cultural context
GC-7	Capable of using digital technologies and methods of searching, processing, analyzing, storing and presenting information (in the professional field) in	GC-7.1. Searches for the necessary sources of information and data, perceives, analyzes, remembers and transmits information using digital means, as well as with the help of algorithms when working with data received from various sources in order to effectively use the information received to solve problems

Competence code	Competence	Competence indicators (within the framework of this discipline)
	the digital economy and modern corporate information culture	GC-7.2. Evaluates information, its reliability, builds logical conclusions on the basis of incoming information and data
SPC-1	Able to apply knowledge (at an advanced level) of fundamental economic science in solving practical and / or research problems	SPC-1.1. Has fundamental knowledge in the field of economic science
		SPC-1.2. Able to use fundamental knowledge to solve applied and / or research problems
		SPC-1.3. Has the skills to choose methods for solving practical and research problems based on fundamental economic knowledge
SPC-3	Able to generalize and critically evaluate scientific research in economics	SPC-3.1. Develops a program of applied and / or fundamental research in the field of economics based on the assessment and generalization of the results of scientific research conducted by other authors
		SPC-3.2. Prepares an analytical note on the results of applied and / or fundamental research in the field of economics
		SPC-3.3. Summarizes conclusions, prepares a conclusion and formulates recommendations on the results of applied and / or fundamental research in the field of economics
SPC-5	Able to use modern information technologies and software tools in solving professional problems	SPC-5.1 Knows modern information technologies and software tools used in solving professional problems
		SPC-5.2 Is able to choose the most effective ones among modern information technologies and software tools for solving professional problems
		SPC-5.3 Has full skills in solving standard tasks of professional activity using information technologies and software tools
PC-1	Able to conduct independent research in accordance with the developed program and on their basis to prepare analytical materials for the evaluation of activities in the field of economic policy and strategic decision-making at the micro and macro levels	PC-1.1. Able to present the results of an independent study in the form of an article or a report at scientific conferences
		PC-1.2. Capable of Conducting Analytical Studies to Evaluate Economic Policy Interventions
		PC-1.3. Able to make a forecast of the main socio-economic indicators of the enterprise, industry, region and economy as a whole
		PC-1.4. Able to make strategic decisions at the micro and macro levels on the basis of independent research
PC-2	Able to present the results of an independent study in the form of an article or a report at scientific conferences	PC-2.1. Able to conduct analytical studies to assess economic policy measures
		PC-2.2. Able to make a forecast of the main socio-economic indicators of the enterprise, industry, region and economy as a whole

Competence code	Competence	Competence indicators (within the framework of this discipline)
		PC-2.3. Able to make strategic decisions at the micro and macro levels on the basis of independent research

3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE
