**Federal State Autonomous Educational Institution of Higher Education  
PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA  
RUDN University**

**Faculty of Science**

---

educational division (faculty/institute/academy) as higher education programme developer

## **COURSE SYLLABUS**

---

**Emerging contaminants: from fate to environmental remediation**

course title

**Recommended by the Didactic Council for the Education Field of:**

---

**04.04.01 «Chemistry»**

field of studies / speciality code and title

**The course instruction is implemented within the professional education programme of higher education:**

**«Bioenergies and Biorefineries»**

---

higher education programme profile/specialisation title

**2024**

## 1. COURSE GOAL

The goal of the course “Emerging contaminants: from fate to environmental remediation” is to understand and comprehend the threats and involvement of emerging contaminants of different forms (micro/nanoplastics, pharmaceuticals, PFAS, etc.) in the environment including on soil, water and air as well as their speciation and distribution, including various different forms of their remediation/removal. These will include some toxicological considerations in their fate and mobility into the environment.

## 2. REQUIREMENTS FOR LEARNING OUTCOMES

Mastering the course “Emerging contaminants: from fate to environmental remediation” is aimed at the development of the following competences:

*Table 2.1. List of competences that students acquire through the course study*

Competence code	Competence descriptor	Competence formation indicators (within this course)
PC-1	Ability to develop a work plan and to choose adequate methods for solving research problems in the chosen field of chemistry, chemical technology or sciences related to chemistry	PC-1.1 Ability to prepare a general plan of research and detailed plans for individual stages
		PC-1.2. Ability to select experimental and calculation-theoretical methods for solving the problems based on the available material and time resources

## 3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The course “Emerging contaminants: from fate to environmental remediation” refers to the **elective** component of B1 block of the higher educational programme curriculum.

Within the higher education programme students also master other (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the course study.

*Table 3.1. The list of the higher education programme components/disciplines that contribute to the achievement of the expected learning outcomes as the course study results*

Competence code	Competence descriptor	Previous courses/modules*	Subsequent courses/modules*
PC-1	Ability to develop a work plan and to choose adequate methods for solving research problems in the chosen field of chemistry, chemical technology or sciences related to chemistry	Modern organic synthesis and pharmacology Alternative / new tools for organic synthesis Advanced Organic Synthesis Catalyst (nanomaterials) design and applications Experimental lab 1: Flow + alternative technologies	Student Scientific- Research work Pre-graduation practical training

\* To be filled in according to the competence matrix of the higher education programme.

#### 4. COURSE WORKLOAD AND ACADEMIC ACTIVITIES

1) The total workload of the course “Emerging contaminants: from fate to environmental remediation” is 2 credits (72 academic hours).

Table 4.1. Types of academic activities during the periods of higher education programme mastering (**full-time training**)\*

Type of academic activities		Total academic hours	Training modules			
			1	2	3	4
<i>Contact academic hours</i>		48				48
including:						
Lectures (LC)		32				32
Lab work (LW)		16				16
Seminars (workshops/tutorials) (S)						
<i>Self-studies</i>		6				6
<i>Evaluation and assessment (exam/passing/failing grade)</i>		18				18
<b>Course workload</b>	academic hours	<b>72</b>				<b>72</b>
	credits	<b>2</b>				<b>2</b>

#### 5. COURSE MODULES AND CONTENTS

Table 5.1. Course contents and academic activities types

Course module title	Course module contents (topics)	Academic activities types
Module 1. Introduction to emerging contaminants. Properties and behaviours of emerging pollutants	Topic 1.1. Introduction to emerging contaminants. Properties and behaviours of emerging pollutants	LC
Module 2. Types of emerging contaminants	Topic 2.1. Organic pollutants (dyes, etc.)	LC, LW
	Topic 2.2. Pharmaceuticals	LC, LW
	Topic 2.3. PFAS	LC, LW
	Topic 2.4. Micro and nanoplastics	LC, LW
	Topic 2.5. Nanomaterials	LC, LW
	Topic 2.6. Others (miscellaneous)	LC, LW
Module 3. Fate and mobility in the environment	Topic 3.1. Distribution and speciation (airborne, water, soil, etc.)	LC, LW
	Topic 3.2. Compounds and intermediates. Toxicity and environmental concerns	LC, LW
	Topic 3.3.	LC, LW
Module 4. Environmental remediation. Degradation and removal	Topic 4.1. Physico-chemical degradation methods	LC, LW
	Topic 4.2. Photocatalytic degradation method	LC, LW
	Topic 4.3. Biological degradation methods	LC, LW
	Topic 4.4. Others	LC, LW

\* - to be filled in only for **full**-time training: LC - lectures; LW - lab work; S - seminars.

## 6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Table 6.1. Classroom equipment and technology support requirements

Type of academic activities	Classroom equipment	Specialised educational / laboratory equipment, software, and materials for course study (if necessary)
Lecture	A lecture hall for lecture-type classes, equipped with a set of specialised furniture; board (screen) and a set of devices for multimedia presentations.	Projector, motorized screen for projectors, wi-fi
Lab work	A classroom for laboratory work, individual consultations, current and mid-term assessment; equipped with a set of specialised furniture and machinery.	Rotary evaporator, bulb heater, magnetic stirrer without heating, magnetic stirrer with heating, electronic scales, vacuum pump
Self-studies	A classroom for self-studies (can be used for seminars and consultations), equipped with a set of specialised furniture and computers with access to the electronic information and educational environment.	<p><b>Faculty of Science Reading Room</b> Ordzhonikidze D.3. Coworking area Monday - Friday 10.00 – 22.00</p> <p><b>Reading room of the main building of the RUDN</b> Coworking area Monday - Saturday 9.00 - 23.00 Hall No. 2 Monday - Thursday 10.00 - 17.45 Friday 10.00 - 16.45 Hall No. 6 Monday - Thursday 10.00 - 17.45 Friday 10.00 - 16.45</p>

\* The premises for students' self-studies are subject to **MANDATORY** mention

*Training toolkit for self- studies to master the course \*:*

1. A set of lectures on “Emerging contaminants: from fate to environmental remediation”
2. The laboratory workshop on “Emerging contaminants: from fate to environmental remediation”

\* The training toolkit for self-studies to master the course is placed on the course page in the university telecommunication training and information system under the set procedure.

## **8. ASSESSMENT TOOLKIT AND GRADING SYSTEM\* FOR EVALUATION OF STUDENTS’ COMPETENCES LEVEL UPON COURSE COMPLETION**

The assessment toolkit and the grading system\* to evaluate the competences formation level (competences in part) upon the course study completion are specified in the Appendix to the course syllabus.

\* The assessment toolkit and the grading system are formed on the basis of the requirements of the relevant local normative act of RUDN University (regulations / order).
