**Federal State Autonomous Educational Institution for Higher Education  
PEOPLES' FRIENDSHIP UNIVERSITY OF RUSSIA  
NAMED AFTER PATRICE LUMUMBA  
(RUDN University)**

**Academy of Engineering**

educational division (faculty/institute/academy) as higher education programme developer

**COURSE SYLLABUS**

**Hydrogeology**

course title

**Recommended by the Didactic Council for the Education Field of:**

**05.04.01 Geology**

field of studies / speciality code and title

**The course instruction is implemented within the professional education programme of higher education:**

**Mining Geology**

higher education programme profile/specialisation title

## 1. COURSE GOAL(s)

The goal of the course “Hydrogeology” is acquiring knowledge, skills and experience in the field of groundwater, their resources and composition, distribution and interaction with the Earth’s crust, management and protection; formation of systems hydrogeological thinking, characterizing the stages of competence formation and ensuring the achievement of the planned results of the educational programme.

## 2. REQUIREMENTS TO LEARNING OUTCOMES

The course implementation is aimed at the development of the following competences (competences in part):

*Table 2.1. List of competences that students acquire during the course*

<b>Competence code</b>	<b>Competence descriptor</b>	<b>Competence formation indicators (within this course)</b>
GPC-1.	Capable of using the theoretical foundations of special and new sections of geological sciences to solve professional activity problems.	GPC-1.1. Knowledge of the basics of special and new sections of geological sciences; GPC-1.2. Selects a method or technique to solve a professional problem; GPC-1.3. Knows how to select a method or method of solving a professional problem.
PC-2.	Capable of justifying the need, choosing the best methodology, planning, implementing, interpreting results, and supervising geophysical work at various stages of mineral site development.	PC-2.1. Know the theoretical basics of geophysical research PC-2.2 Know how to select the best methodology, design, implement.
PC-3	Capable of projecting, implementing, and managing a hydrogeological study of the territory during the exploration and development of a mineral deposit.	PC-3.1 Know the theoretical foundations and methods of hydrogeological study of the territory at the stage of exploration and development of mineral deposits.
PC-4.	Capable of designing, assisting with, and supervising a geologic study of a subsoil area at various stages of development.	PC-4.1 Know the theoretical basis and methods of geological study of the subsoil area at various stages of its development; PC-4.2 Be able to apply methodological solutions in the design and implementation of the geological study of a subsoil area at various stages of its development.

## 3. COURSE IN HIGHER EDUCATION PROGRAMME STRUCTURE

The course refers to the variable component of (B1) block of the higher educational programme curriculum.

Within the higher education programme students also master other (modules) and / or internships that contribute to the achievement of the expected learning outcomes as results of the course study.

*Table 3.1. The list of the higher education programme components/disciplines that contribute to the achievement of the expected learning outcomes as the course study results*

<b>Competence code</b>	<b>Competence descriptor</b>	<b>Previous courses/modules</b>	<b>Subsequent courses/modules</b>
GPC-1.	Capable of using the theoretical foundations of special and new sections of geological sciences to solve professional activity problems.	Mining Geology; Engineering and Geological Support of Subsoil Use; Geological and Geophysical Basics of Mineral Prospecting and Exploration	Research Work (Mining Geology). Part 2; Research Work (Geological and Geophysical Survey). Part 2; Final State Attestation
PC-2.	Capable of justifying the need, choosing the best methodology, planning, implementing, interpreting results, and supervising geophysical work at various stages of mineral site development.	Introduction Practical Training; Modelling of Mineral Deposits; Mining Geology; Geological and Geophysical Basics of Mineral Prospecting and Exploration; Regional Geology. Geology of Central and Southern Africa	Research Work (Geological and Geophysical Survey). Part 2; Research Work (Mining Geology). Part 2; Pre-graduation Practical Training; Final State Attestation
PC-3	Capable of projecting, implementing, and managing a hydrogeological study of the territory during the exploration and development of a mineral deposit.	Mineralogy; Mining Geology	Pre-graduation Practical Training; Research Work (Mining Geology). Part 2; Final State Attestation
PC-4.	Capable of designing, assisting with, and supervising a geologic study of a subsoil area at various stages of development.	Modelling of Mineral Deposits; Mining Geology; Geological and Geophysical Basics of Mineral Prospecting and Exploration; Regional Geology. Geology of Central and Southern Africa; Introduction Practical Training	Research Work (Geological and Geophysical Survey). Part 2; Research Work (Mining Geology). Part 2; Pre-graduation Practical Training; Final State Attestation

#### 4. COURSE WORKLOAD AND ACADEMIC ACTIVITIES

The total workload of the course “Hydrogeology” is 5 credit units.

Table 4.1. Types of academic activities during the periods of higher education programme mastering

Type of academic activities		TOTAL, ac. hrs.	Semesters/ training modules
			3
<i>Contact academic hours</i>		54	54
Lectures (LC)		18	18
Lab work (LW)		-	-
Seminars (workshops/tutorials) (S)		36	36
<i>Self-studies</i>		90	90
<i>Evaluation and assessment (exam/passing/failing grade)</i>		36	36 <i>Exam</i>
<b>Course workload</b>	academic hours	<b>180</b>	<b>180</b>
	credits	<b>5</b>	<b>5</b>

#### 5. COURSE CONTENTS

Table 5.1. Course contents and academic activities types

Course module title	Course module contents (topics)	Academic activities types
Module 1. Fundamental hydrogeology	Topic 1.1. Water in the earth crust	LC
	Topic 1.2. Properties of Aquifers	LC, S
	Topic 1.3 Principles of Ground-Water Flow	LC, S
	Topic 1.4 Types of Aquifers	LC, S
Module 2. Water Chemistry	Topic 2.1. Major ions and trace elements chemistry	LC, S
	Topic 2.2. Organic matter, gas composition and isotopes	LC
	Topic 2.3. Origin of water chemical composition <sup>^</sup> mechanisms, stages, factors	LC, S
Module 3. Applied hydrogeology	Topic 3.1 Water Quality and Ground-Water Contamination	LC, S
	Topic 3.2 Ground-Water Development and Management	LC, S

\* LC - lectures; LW - lab work; S - seminars.

#### 6. CLASSROOM EQUIPMENT AND TECHNOLOGY SUPPORT REQUIREMENTS

Table 6.1. Classroom equipment and technology support requirements

Type of academic activities	Classroom equipment	Specialised educational / laboratory equipment, software, and materials for course study (if necessary)

Lecture	A lecture hall for lecture-type classes, equipped with a set of specialised furniture; board (screen) and technical means of multimedia presentations.	
Seminar	A classroom for conducting seminars, group and individual consultations, current and mid-term assessment; equipped with a set of specialised furniture and technical means for multimedia presentations.	
Self-studies	A classroom for independent work of students (can be used for seminars and consultations), equipped with a set of specialised furniture and computers with access to the electronic information and educational environment.	

## 7. RESOURCES RECOMMENDED FOR COURSE STUDY

### *Main reading:*

1. Fetter C.W. Applied hydrogeology. Waveland Press, 2018 г., 621 стр., ISBN: 1-4786-3709-9 <https://www.geokniga.org/>
2. Celia M.A., Pinder G.F. Subsurface hydrology. John Wiley & Sons INC, 2006 г., 483 стр., ISBN: 978-0-471-74243-2 <https://www.geokniga.org/>
3. Hiscock K.M. Hydrogeology. Principles and practice. Blackwell science Ltd, 2005 г., 404 стр., ISBN: 0-632-05763-7. <https://www.geokniga.org/>

### *Additional reading:*

1. Sanderson D.J., Zhang X. Numerical modelling and analysis of fluid flow and deformation of fractured rock masses. Elsevier, 2002 г., 300 стр., ISBN: 0-08-043931-4 <https://www.geokniga.org/>
2. Kirsch R. Groundwater geophysics. A tool for hydrogeology. Springer, 2006 г., 499 стр., ISBN: 978-3-540-29383-5 <https://www.geokniga.org/>
3. Kovalevsky V.S., Kruseman G.P., Rushton K.R. Groundwater studies. Paris, 2004 г., 430 стр., ISBN: 92-9220-005-4. <https://www.geokniga.org/>

*Training toolkit for self- studies to master the course* \*:

1. The set of lectures on the course “Hydrogeology”.
2. Guidelines for students on the development of the course “Hydrogeology”.

\* The training toolkit for self- studies to master the course is placed on the course page in the university telecommunication training and information system under the set procedure.

## **8. ASSESSMENT TOOLKIT AND GRADING SYSTEM\* FOR EVALUATION OF STUDENTS’ COMPETENCES LEVEL UPON COURSE COMPLETION**

The assessment toolkit and the grading system\* to evaluate the competences formation level (competences in part) upon the course study completion are specified in the Appendix to the course syllabus.

\* The assessment toolkit and the grading system are formed on the basis of the requirements of the relevant local normative act of RUDN University (regulations / order).

### **DEVELOPERS:**

**Professor, Department of  
Geology, School of Earth  
Sciences and Engineering, TPU**  
position, educational department

**N. Guseva**  
name and surname

**Researcher in the Department  
of Geology, School of Earth  
Sciences and Engineering, TPU**  
position, educational department

**D. Purgina**  
name and surname

### **HEAD OF EDUCATIONAL DEPARTMENT:**

**Department of Subsoil Use and  
Oil&Gas Engineering**  
educational department

**A. Kotelnikov**  
name and surname

### **HEAD OF HIGHER EDUCATION PROGRAMME:**

**Head of the Department of  
Subsoil Use and Oil&Gas  
Engineering**  
position, educational department

**A. Kotelnikov**  
name and surname
